Weekly Capacity Rules

Fill it in once, review it on Friday. Keep it by the schedule so everyone works from the same rules. These are our suggestions, not data.

1. HELD SLOTS (OUR SUGGESTION: HOLD ONE SLOT PER TECH)

Slots held per tech, per day: _____ Days: ☐ Mon ☐ Tue ☐ Wed ☐ Thu ☐ Fri ☐ Sat ☐ Sun

Held slots are for (routine work can't take them): _____

☐ Online booking can't book a held slot (it only offers what we'd book on the phone).

2. RELEASE TIME FOR UNUSED HELD SLOTS

Unused held slots are released at: _____ (pick a time, keep it a few weeks; we don't know a right answer)

Released slot goes first to: ☐ top name on the callback list ☐ other: _____

3. WHAT MOVES FIRST

Day is full and an emergency comes in. Move first: _____ Not: the new emergency.

Who calls the moved customer (before they find out at the door): _____

After hours, on-call is for emergency job types only: _____

4. CALLBACK LIST FOR NO-SLOT CALLERS (OUR SUGGESTION)

List owner (one named person): _____ Kept in: _____

Checked at: _____ Write down: name, number, the problem, job type, earliest window they'd accept.

Only tell a caller "we'll call if something opens" if the owner above is named and checks the list.

5. REFERRAL PARTNER FOR OVERFLOW (OUR SUGGESTION)

Shop 1: _____ Phone: _____ ☐ Talked to them first

Shop 2: _____ Phone: _____ ☐ Talked to them first

Pick shops you'd send your own family to. If you don't know anyone good, it's fine to say so. A referral is still a G: circle it.

FRIDAY CHECK

Count G by weekday and by job type (emergency, repair, maintenance, install). If one day keeps showing up, that day gets the held slot. Change one thing at a time. Compare two weeks before and two weeks after.

Our suggestion, not an industry standard, and no result is promised. Not legal advice: check with your state contractor board or a lawyer about licensing and referral rules before you refer or subcontract work.
